EXPERIENCE

Fullstack developer
Evozon

📅 Aug 2024 – May 2025   ● Cluj-Napoca, Hybrid

- Contributed to multiple .NET backend projects, adapting quickly to different codebases and business requirements.
- Collaborated with international teams, particularly from New York, coordinating work across time zones.
- Participated in structured Agile ceremonies including daily stand-ups, sprint planning, and retrospectives.

Fullstack intern
Evozon

📅 Jun 2024 – Aug 2024   ● Cluj-Napoca, On-site

- Collaborated in an 8-person Agile team to develop a full-stack web application using .NET and React.
- Gained hands-on experience with design patterns, clean architecture, and writing maintainable, scalable code.
- Participated in code reviews, implemented feedback, and learned best practices for commenting and teamwork.

PERSONAL PROJECTS

WHY - Social Media App
Built a social media app, tackling challenges like SSR/CSR for Google SEO and performance, optimizing database design, while having an online presence. Tech stack: Next.js and .NET.

Discloud - Fun Cloud Storage Experiment
Created a cloud storage app using Discord's messages as the actual storage, learning API integration and frontend development with Python, Discord's API, and React.

Hackathons - Winning Mobile Apps
Developed mobile apps for multiple hackathons, consistently placing in the top 3, learning about native components and cross-platform development with React Native and Java.

Game development
Built multiple simple mobile and desktop games, including some for GMTK game jams. Learnt to use C#, Unity, Godot

PROUD OF MY

🏆 **Clean and Maintainable code**
Passionate about writing clear, well-structured code using design patterns to minimize technical debt

💓 **Early Learning Journey**
Began working as a software developer at 19, balancing university studies with professional experience

📈 **Adaptability**
I switched through multiple projects, quickly mastering new requirements and technologies

STRENGTHS

Passionate   Eye for detail

Team worker

.NET   React   Next.js   Typescript

Python   SQL   Java   Entity Framework

Spring Boot   Hibernate   Git   Agile

React native   CSS   Shell

EDUCATION

B.Sc. in Computer Science
Babes-Bolyai University

📅 July 2023 – June 2026

- Gained a solid foundation in programming, algorithms, data structures, databases, and software engineering. Developed strong analytical thinking and problem-solving abilities. Beyond the curriculum, consistently pursued complementary knowledge and skills through related projects and self-driven learning inspired by academic exposure.
